

**Join us at our conference:**

**“Expanding roles and opportunities for the pharmacist in optimizing use of oral cancer drugs”**

Dear Madam, Sir,

Clinical pharmacists play an important role in safe, effective and efficient use of oral cancer drugs. In order to exchange current pharmaceutical care practices on oral cancer drugs and to inspire colleagues with future possibilities, the European Society of Clinical Pharmacists organizes on 19-20 February 2018 a two- day workshop in Reykjavik (Iceland) on oral cancer drugs.

**Attractive workshop program on oral cancer drugs**

During this international workshop plenary lectures and workshops will involve topics like:

- New pharmacotherapeutic strategies
- Management of side effects
- Cost-effective use of oral cancer drugs
- Patient education and adherence
- Drug-drug and drug-food interactions
- Safe handling of oral cancer drugs
- Availability of oral anticancer drugs

The preliminary program of our workshop is attached to this document.

**We look forward to meet you in Reykjavik!**

Care can't be delivered solitary, and therefore we would like to invite commercial partners to our symposium. As commercial partner, you can present your organization on different ways (booth, keycord, congress bag, congress participant or by inviting pharmacists to join our workshop).

We really think that both the ESCP and your company will benefit to meet in Reykjavik. So we hope to welcome your company on our workshop.

If you have further enquiries, do not hesitate to contact your local contact or our international office ([escp@planet.nl](mailto:escp@planet.nl) or [international.office@escpweb.org](mailto:international.office@escpweb.org)).

Kind regards,

Dr BJF (Bart) van den Bemt, PharmD/PhD  
President of the ESCP
